FOR BUYERS

Questions to ask any fluid supplier

A supplier who can't answer these clearly is telling you something. Take this list to your next vendor meeting and note the answers as you go.

THE CHEMISTRY

1. **Does this fluid meet the OECD or EU PFAS definition?**
2. **What are its global warming potential and atmospheric lifetime?**
3. **What does it break down into in the atmosphere, and is TFA one of them?**
4. **Is independent toxicity and environmental data published?**

IN YOUR DATA CENTER

5. **What fluid loss rate should I expect in a typical system?**
6. **Is there a take-back, reclamation or verified destruction program?**

RULES AND SUPPLY

7. **What is its current regulatory status in the US and EU?**
8. **How do you expect the regulation to affect supply over the system's life?**

General information only. Not legal, regulatory or safety advice. Check each product's SDS.
